

Subject: Congratulations to the Tweel Team! - Forwarded From Ralph Dimenna

Congratulations! September 2, 2014, marks one year without a recordable injury at the Tweel site. On behalf of the Tweel management team, please accept my thanks and appreciation for this remarkable achievement. This milestone exemplifies the leadership and commitment that you and all the contractors and Michelin employees who you lead continuously demonstrate.

Your efforts have been critical to establishing a culture where every injury is truly seen as preventable. However, and even more importantly, is that through your leadership you are establishing a culture where every day each person performs tasks that demonstrate they actively care for their safety and those they work with.

Thank you!

Ralph DIMENNA

Thanks to you guys we made this milestone. Your efforts are truly appreciated.
Becky

FW: Congratulations to the Tweel Team! - Forwarded From Ralph Dimenna

IMS Team, please check out the milestone IMS made at the Michelin Tweel Project. This is a GREAT accomplishment and it makes it even better when a Vice President of Michelin takes time to recognize this accomplishment!!!! BUT, it is not only at the Michelin Tweel Project that we have done this, **IMS has done this at all locations we have worked because IMS has made it 385 days without a recordable Safety accident!!!!** This is a better Safety record than at Tweel and it shows that not only are we working safe at Tweel, but we all are working SAFE on all jobs no matter where they are at!!!!

Please pass this message along to all employees of IMS and make sure they all know I am very proud of everyone for making it over a year without an accident!

Thank you,

Kevin T. Craft
